Anti-Tip Measures

WARNING

Furniture tip overs can result in death or serious injuries. To reduce the likelihood of tip over, this product should be used with the enclosed Anti-Tip Kit. This Anti-Tip Kit is only a deterrent. It is not a substitute for proper adult supervision. Manufacturer and retailer assume no liability for improper installation or excess loads placed on screws, brackets, or straps. When properly installed, this restraint provides protection against unexpected tipping of furniture. This Anti-Tip Kit **MUST** be installed into the wall using proper mounting hardware **OR** into a wall stud using appropriate screws. Position of the Anti-Tip Kit depends on the product and the location of the wall studs. The hardware provided is not a comprehensive solution for all wall types. Be sure to consult a professional or your local hardware store to determine the hardware needed for your specific wall type (plaster, drywall, concrete, etc.).

Anti-Tip kit contents

Anti-Tip kit installation

Using a second person to assist you, place the unit in the desired final location against a wall. It is suggested to use a stud finder to find wall studs along the length of the unit and roughly 1 inch below the top. Where possible, mark a drill hole position on the wall where there is a stud and use a Drill or Screwdriver (NOT INCLUDED) to attach Wall Brackets to the wall using Long Screws in the location of the wall studs.

In a case where there is no wall stud, hold Brackets on wall and mark the drill hole positions so that they are roughly 1 inch below the top of the piece. Using a Drill (NOT INCLUDED) with a drill bit roughly the diameter of the plastic Wall Plugs, drill pilot holes in marked positions. Insert the plastic Wall Plugs into the holes until the tops are roughly flush with the wall. Align the holes and insert the Long Screws through Brackets and into the corresponding holes in the wall using a Phillips Head Screwdriver (NOT INCLUDED).

Next, attach remaining 2 Brackets to the back of the piece using Short Screws so they align with Brackets installed on the wall. Loop Straps through Brackets (A) on the furniture piece, then through Brackets on the wall and tighten until snug. Installation is now complete.

IMPORTANT: Check that the Wall Brackets are firmly screwed into the wall and the Cable Ties are snug.

If there is any hesitation, please consult a professional or your local hardware store.
